ROLL OFF CONTAINER CRITERIA FOR PLACEMENT CORAOPOLIS BOROUGH

The placement of a roll off container on a roadway within the Borough of Coraopolis may be permitted providing the following criteria are satisfied:

1. The requestor has no other available space (driveway, lawn, etc..) that the roll off container can be placed.
2. The roll off container will not be placed on the roadway longer than 14 days.
3. The roll off container will be removed within 24 hours of it being filled.
4. The roll off container will be secured so as to prevent debris from the container from blowing from or spilling from the container.
5. Traffic control devices will be properly placed and maintained to alert and warn drivers of the potential hazards created by the placement of the container.
6. The requestor completes an application requesting the placement of the roll off container and agrees to the conditions and requirements associated with such request.
7. No garbage will be placed in a roll off container.
8. The request is approved by the Chief of Police or his designee.
9. If the unit occupies a metered parking space, the permittee shall pay the Borough five (\$5.00) Dollars per day for each space so occupied.

NO roll off container will be allowed to be placed in any area that a motor vehicle would be prohibited from stopping, standing or parking by either ordinance or statute. *(Unless articulable circumstances present and only upon approval of Chief of Police or designee.)*

Traffic Control Devices:

1. Traffic control devices shall be placed when the roll off container is placed on the roadway, and they shall be properly maintained during the time they are placed.
2. Traffic control devices shall remain in place only as long as they are needed, and they shall be removed as soon as possible thereafter.
3. Traffic control devices shall be correctly positioned, clean, legible, operative, and in good state of repair. The reflective sheeting is not permitted to be scratched, scarred, dirty or show evidence of loss of reflectivity. They shall be repositioned, cleaned, repaired and replaced when necessary to maintain their effectiveness.
4. Devices shall be positioned to provide for a smooth and gradual transition of traffic around the roll off container.
5. Devices shall be constructed so as not to inflict undue damage to a vehicle that strikes them inadvertently.
6. Only cones (28" to 36"), drums, Type I or II Barricades, or minicades shall be used as traffic control devices. Devices shall have reflective sheeting.
7. At a minimum, there shall be at least 4 (four) devices positioned in front of the roll off container, as shown in the attached diagram, and 2 (two) devices behind.
8. In addition to the traffic control devices, the roll off container must display reflective material mounted on each of its Corners.
